LEGUMINOUS FORAGE CROPS

Trifolium incarnatum L.

REDPOWER

Morphological and physiological characteristics

- Shape : erect
- Size: medium – high
- Flower: red – purple flower head
- Re-sprouting speed: fast

Agronomic features

- Cold resistance: good
- Diseases resistance: good
- Productivity: high
- Use : grazing, hay

Technical advice

- Sowing time : spring
- Sowing quantity: 150 - 200 seeds/ha
- Fertilization: phosphorous (60-80 units/ha), nitrogen (30-50 units/ha).

REDPOWER is a crimson clover early variety that in the colder areas replaces the late varieties. It is characterized by a rigorous growth rate and good retraction capacity.

It lends itself to the spring sowing intended for pasture or hay production. Faces easily competition with other species, ending with both crops, consociation and pure.
